Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a response to the applicant's filing on August 21, 2006 with original claims 1-12 and 14-16 currently presented in the instant application.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-8, 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Parker et al. (US Pat. 6,121,732).

Parker discloses an igniter circuit (Fig. 5) for an electronic lamp driver comprising first and second supply input terminals (Vs, VR); a switch branch (66, 68) comprising a first controllable ignition switch and a second controllable ignition switch connected in series between said first and second supply input terminals; a transformer (33) having a primary winding (41) and a secondary winding (61); an igniter coil (58) connected in series with said primary transformer winding (60), this series arrangement having one end connected to a node (VQ) between said two controllable ignition switches ; a storage capacitor (72) connected between another end of said series arrangement and one of the supply input terminals, low voltage input terminal.

Allowable Subject Matter

3. Claims 2, 9, 10, 11, 12 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: the prior fails to establish an igniter capacitor connected in parallel to the

secondary transformer winding as indicated in claim 2. Limitations as described in claims 10, 12 and 15 are also allowable.

Citation of pertinent prior art

5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. See prior arts/references listed on the PTO-892 form attached.
